PRIVATE EXPERIENCE / ENGLISH

Río Salado · the Canyon

A linear hike through river corridors and gorges, finishing at Chuschul Bridge. Water shapes much of the experience: the flow and terrain conditions determine which sections can be followed.

Your itinerary

Approach to the confluence

The transfer brings you to the start of the trek within the Grande and Salado river system. Before entering the riverbed, the route and the day's conditions are assessed.

Trekking along the river corridor

We follow the watercourse, moving between canyon walls and more open areas. There are river crossings and potentially wet surfaces; the guide will determine how to navigate these and may alter the route if the water flow prevents safe passage.

Gorge and break

The narrow sections reveal the canyon’s erosion patterns and mineral deposits. We will find a suitable spot to stop for a snack and recharge before continuing.

Exit at Chuschul

The route concludes at a pickup point, where a vehicle will take you back to San Pedro. This linear route is distinct from the 6 km short hike described elsewhere in the program.

DURATION

Approximately 6 hours of trekking

DISTANCE / ROUTE

Approx. 12 km on foot

EFFORT

Trekking with fords

MEALS

Includes a trail snack, a sandwich, and beverages.

TRANSPORT

Hotel pickup and drop-off in San Pedro (depending on location). Private transfers with stops coordinated by the guide.

PREPARATION

Footwear suitable for water and rocky terrain, a dry change of clothes, and sun protection. The excursion requires checking the water flow; completing the entire gorge is not guaranteed.
