PRIVATE EXPERIENCE / ENGLISH

Vallecito · the Hidden Landscape

An experience along the tracks and trails of the Salt Mountain Range (Cordillera de la Sal), featuring viewpoints, insights into the area's mining history, and a walk along the ridges. This program differs from the standard public access to the Valley of the Moon (Valle de la Luna) and concludes at the Great Dune (Gran Duna).

Your itinerary

Ckari Viewpoint and the Plain of Patience (Llano de la Paciencia)

We begin with a panoramic overview of the landscape before continuing across the plain. Stops along the way reveal the mountain range's strata, folds, and varying textures; your guide will point out ancient routes and share the history of the region.

Magic Bus (Bus Mágico)

We stop beside an old mining vehicle-a relic of the area's industrial past. The visit combines photography with an exploration of the traces left behind by mining operations in the desert. Does not include entering unstable structures.

Trekking along ridges/ledges

We leave the vehicle to walk along a pre-arranged route following the ridges. The highlight lies in the shifting perspectives and views of the mountains. The specific distance and path are chosen based on the group and the terrain.

Great Dune and return

The final approach involves traversing sand and open terrain. There is time to take in the landscape and descend to the pickup point before returning to San Pedro. Breaks are taken throughout the excursion.

DURATION

Depending on the chosen trek

DISTANCE / ROUTE

Route to be confirmed

EFFORT

Slopes and sandy terrain

MEALS

Snacks and drinks are provided as per the program. No complimentary access, shower facilities, or other amenities outside of the scheduled tour are included.

TRANSPORT

Hotel pickup and drop-off in San Pedro (depending on location). Private transfers with stops coordinated by the guide.

PREPARATION

Sturdy footwear with good grip, water, and sun protection are required. Please confirm the participants' prior experience with us so we can determine the appropriate walking route.
